

A better environment inside and out.™

Solar Gard® LX 70 Window Film

Feel the difference without seeing
the difference

Ultimate Comfort, ultimate
light, ultimate protection

Solar Gard LX 70 window film offers you the ultimate control in improving your comfort, maximizing daylight and adding valuable protection.

Ultimate Comfort

Now every employee can enjoy working, without having to increase use of air conditioning in order to stay comfortable.

Solar Gard LX 70 keeps uneven temperatures, hotspots and uncomfortable heat at bay by keeping out over half of the sun's total solar energy. This provides you with improved energy efficiency, utility expenses and comfort – you'll feel and enjoy the difference instantly!

Ultimate Light

Solar Gard LX 70 clearly lets the sunlight you love shine in by maintaining maximum visible light transmittance. Because it was designed to be perfectly neutral, Solar Gard LX 70 doesn't change the way your windows appear or the way you see through them – inside or out.

Solar Gard LX 70 offers invisible sun-related protection, ideal for anyone wanting to maintain a clear glass appearance and maximum daylight.

Ultimate Protection

With Solar Gard LX 70 on your glass, your furnishings, merchandise and artwork receive premium protection against fading. This results from Solar Gard LX 70 blocking over 99 percent of ultraviolet light and more than half the amount of total solar energy from entering your building.

While nothing prevents fading entirely, Solar Gard LX 70 is one of the most effective and attractive ways to prolong the life of your precious valuables. In addition, this helps protect you from premature skin aging and some potential skin cancers.

What causes fading?

Cause	% of Total Fade Damage
UV Light	40%
Visible Light	25%
Infrared Light	25%
Other Factors*	10%
Total Exposure	100%

The sun's ultraviolet radiation, heat and light cause fading and deterioration of fabrics, carpets, furnishings, storefront displays and other interior items. All Solar Gard films reject up to 99% of harmful ultraviolet radiation, and varying amounts of heat and light. This helps dramatically reduce damage to your interiors and furnishings, keeping them in like-new condition longer.

*"Other Factors" include humidity, air quality, temperature and material temperature and material construction.

About Solar Gard®

For over 30 years, Solar Gard has been one of the most trusted and popular window film lines in the world. Sold through company-owned distribution centres and independent dealers and distributors, Solar Gard window films are installed on thousands of buildings and millions of vehicles worldwide.

Solar Gard films are manufactured by Bekaert Specialty Films in ISO 9001:2008 certified facilities. To ensure the manufacturing activities and products have minimal impact on the environment, the company has also achieved ISO 14001:2004 certification for its Environmental Management System (EMS).

Once Solar Gard LX 70 window film is professionally installed you won't see it, as glass maintains its original look, but you will definitely feel it.

Ultimate performance

On clear 4mm (3/16") glass the sun's heat and light pour through. With Solar Gard LX 70 installed on your windows, over half of the sun's total solar energy is kept out, including over 99% of the ultraviolet light, while the visible light remains. Solar Gard LX 70 is like sunscreen for your environment.

Ultimate Longevity

Windows are cleaned and maintained as usual with Solar Gard LX 70. Plus, the product is backed by an industry-leading warranty.

Solar Gard LX 70 window film is ideal for shopfronts, museums, offices and historic buildings – any property where maintaining sunlight while reducing heat is important.
